

Kestrel TSCM[®] Professional Software

*The first Quarter of 2023 Has Decidely Exceeded
Our Anticipated Business Expectations!*

April 2023 | Issue 94

Technical Research and Standards Group

Paul D Turner, TSS TSI

The Future is Bright!

My recent trip to the United Kingdom (UK) and France (FR) in March, exceeded all of my expectations, and surfaced important business prospects.

This trip was full of surprises and was very special for me personally and witness to wonderful news.

Our presence at the Security and Policing Home Office Event, with Vilution Ltd., and a busy schedule of

high-level client visits and on-site Kestrel[®] familiarization briefings, rounded out the way too short trip. Our software was expertly represented at the Special Operations Forces Innovation Network Seminar (SOFINS), which proved to be yet another very productive event allowing us to, meet the many special forces operators who already recognize the superior capability and unique performance of the Kestrel[®] TSCM Professional Software for critical security and intelligence applications across a complex national security mandate.

My primary goal on this trip, was to meet with and provide support to our UK | EU master distributor, Vilution Ltd., while connecting with our growing network of government, law-enforcement, military, and special operations software users, many of whom are based in the United Kingdom (UK) and the across the greater European Union (EU), including those in France, and Belgium.

Counterfeit Training

We would like to remind all our customers that there is a growing number of, “it’s all amount the money” companies who have little or no training, experience, or understanding of the powerful methodology behind the Kestrel TSCM[®] Professional Software, that is necessary to provide a competent level of product training. We have been taking proactive steps to put an end to this counterfeit training. When in doubt; give us a call!

These entities, have absolutely no permission or authority to market, or in any way provide training to commercial or government customers., nor engage in tenders providing the sales of the Kestrel[®] software and / or training. Doing so is a direct violation of our End-User License Agreement (EULA); registered trademarks, and our intellectual property rights.

We have unfortunately identified numerous entities who have openly stated that they can provide Kestrel TSCM[®] Professional Software training. This is not the case, and we are taking steps to have them remove references to Kestrel[®] sales and training.

All Kestrel[®] training is conducted directly by Professional Development TSCM Group Inc., Technical Security Instructors (TSI); as arranged directly with PDTG Inc., or hosted by one of our master distribution partners, as follows;

- ◆ VILUTION LIMITED (UK) (EU);
- ◆ COMSEC LLC (USA); and
- ◆ SILVERTONE ELECTRONICS (AUS).

Initial training, annual recertification, operator certifications, custom programs, and professional development opportunities, are an absolute must for the modern spectrum warrior. Our official Certified Technical Operator (CTO)[™] and Certified Government Technical Operator (CGTO)[™] programs teach a unique methodology and standard.

Canadian Technical Security Conference (CTSC 2023)[™]

CTSC 2023 is being held in Calgary Alberta Canada for the first time in the 15 year history of the event; at the University of Calgary | Downtown Campus.

This is a must attend professional development oriented 3-day conference event that is set to run from Tuesday April 25, 2023 to Thursday April 27, 2023 after past COVID related event health and safety postponements.

Professional Development TSCM Group Inc., is also running a special advanced 6-day Certified Technical Operator (CTO)[™] program the week prior, from Monday April 17, 2023 to Saturday April 22, 2023, leading up to the CTSC 2023 event, also at the University of Calgary | Downtown Campus.

**Remember, in a Moving Target Threat Model the
Technical Operator is the Spectrum Analyzer...**

Canadian Technical Security Conference (CTSC)[™]

Training and Professional Development

Professional Development TSCM Group Inc.

Technical Security Branch (TSB)

You can attend the Kestrel[®] certification training and the conference event all in a single trip to Calgary Alberta Canada.

CTSC 2023 finishes up on Thursday, and participants might want to consider taking a mini-vacation in the mountains, before returning home. Canmore and Banff, are just a hour's drive (by vehicle) or shuttle bus from the Calgary International Airport.

Our CTO[™] training, professional development conference event, and perhaps a mini-vacation! You have three (3) very powerful incentives for joining us at CTSC 2023. Please contact us for additional information or visit; <https://ctsc-canada.com>

Our time honored competitive "bug-off" event, provides new technical challenges for CTSC 2023, for those entering the technical security industry; and for seasoned professionals alike. Our "office of evil intent" has been plotting and planning! Are you up to the challenge? Our low CTSC 2023 registration fee is just \$495.00 CAD and includes our hospitality night networking event on the (first evening), and our dinner and awards night on the (second evening). Lunch is also included on each day of the conference.

Registration is now open for participants, exhibitors, sponsors, advertisers, and speakers. CTSC 2023 is shaping up to be a professional development opportunity, simply not to be missed!

The balance of 2023 is shaping up to be extremely busy with considerable international travel for various levels of advanced certification training across CA, AU, US, UK, and the EU.

SIGINT Challenge!

The current global threat environment is seeing a cross-over between TSCM and SIGINT. The separation is fast becoming a blur, as current threat technology requires a shift in approach from basic TSCM concepts to a SIGINT approach.

The Kestrel[®] TSCM Professional Software is meeting this challenge head on with a stronger and more scalable SIGINT capability. The first phase of our shift to SIGINT capability is now available as an independent software release, restricted to qualified end-users.

Our new, and powerful Advanced Project Management (APM)[™] technology opens the door for the study and analysis and transmission of critical mission data across multiple radio, multiple location, and multiple operator threat environments.

Kestrel[®] provides a powerful real-time threat management enhanced, software development strategy to address new and evolving threat actor technology...
