

# Kestrel TSCM<sup>®</sup> Professional Software

*The Year Ahead is Decidedly Shaping Up to be the Year of the Kestrel TSCM Professional Software!*

March 2023 | Issue 93

Technical Research and Standards Group

Paul D Turner, TSS TSI

## UK + EU Update

As I write this edition of the TSCM | SIGINT newsletter, a little later than usual, I find myself working from London, in the United Kingdom (UK). Our primary function for this important trip, was to meet with and provide support our UK | EU Master distributor Vilution Ltd., and our mutual Kestrel TSCM Professional Software community clients, with instructor led, operator and procurement related briefings,

by connecting with our growing network of government, law-enforcement, and military software users based in the United Kingdom (UK) and the across the greater European Union (EU), including those in France, and Belgium. Our team also exhibited at the official Security and Policing (S&P) Home Office show this past week.

## Security & Policing Home Office Show

The mighty Kestrel TSCM Professional Software was well-represented and it was amazing to see so many distinguished government entities present, all of which were knowledgeable about the unique capability of the software. Those few who were less familiar with the product soon realized that the Kestrel TSCM Professional Software was uniquely qualified for a wide range of offense and defensive applications and is not just another competitive spectrum analyzer pertaining to work in a TSCM | SIGINT role. The mighty Kestrel is truly unique, easy to use, requires only 5 to 7 days of operator certification training, and is deployable across a wide range of deployment applications that include Operator Assisted Capture (OAC)<sup>™</sup>, Remote Spectrum Surveillance and Monitoring (RSSM)<sup>™</sup>, In-Place Dimensional Geo-Location Heat Mapping, and our powerful Total Energy Capture (TEC)<sup>™</sup> methodology, utilizing advanced Tap Capture Plot (TCP)<sup>™</sup> technology.

**Remember, in a Moving Target Threat Model the Technical Operator is the Spectrum Analyzer...**

## Be Aware of Counterfeit Training and Certification

There are a growing number of, “it is all about the money” companies who have little or no real authentic training or experience with the powerful new methodology of the Kestrel TSCM Professional Software, in providing a competent level of product training. These entities, have absolutely no authority to market or provide training to commercial or government customers. Doing so is a direct violation of our registered trademark and intellectual property. We have unfortunately identified numerous entities who have openly stated that they provide Kestrel TSCM<sup>®</sup> Professional Software training. This is not the case and we are taking steps to have them remove all references to sales and training. All training is conducted directly by Professional Development TSCM Group Inc., Technical Security Instructors (TSI); or training directly arranged or hosted by one of our master distribution partners, as follows;

- ◆ VILUTION LIMITED (UK) (EU);
- ◆ COMSEC LLC (USA); and
- ◆ SILVERTONE ELECTRONICS (AUS).

Initial training, annual retraining, certifications, and attending professional development opportunities, is an absolute must for the modern spectrum warrior. Do not attend counterfeit training. Our official Certified Technical Operator (CTO)<sup>™</sup> and Certified Government Technical Operator (CGTO)<sup>™</sup> programs teach a unique methodology.

## Canadian Technical Security Conference (CTSC 2023)<sup>™</sup>

CTSC 2023 is being held in Calgary Alberta Canada for the first time in the 15 year history of the event; at the University of Calgary | Downtown Campus. Our professional development oriented 3-day event runs from Tuesday April 25, 2023 to Thursday April 27, 2023. Professional Development TSCM Group Inc., will also run a special advanced 6-day Certified Technical Operator (CTO)<sup>™</sup> program the week prior from Monday April 17, 2023 to Saturday April 22, 2023, leading up to the CTSC 2023 event, also at the University of Calgary.

## Canadian Technical Security Conference (CTSC)<sup>™</sup>

### Training and Professional Development

Professional Development TSCM Group Inc.

Technical Security Branch (TSB)

You can attend the Kestrel certification training and conference all in a single trip to Calgary Alberta Canada. CTSC 2023 finishes up on Thursday, and participants might want to consider taking a mini-vacation in the mountains, before returning home. Canmore and Banff, are just a hour's drive (by vehicle) or shuttle bus from the Calgary International Airport. CTO<sup>™</sup> training, professional development conference event, and perhaps a mini-vacation! You have three (3) very powerful incentives for joining us at CTSC 2023. Please contact us for additional information or visit; <https://ctsc-canada.com>

Our time honored competitive "bug-off" event, provides new technical challenges for CTSC 2023, for those entering the technical security industry; and for seasoned professionals alike. Our "office of evil intent" has been plotting and planning! Are you up to the challenge?

Our low CTSC registration fee includes our hospitality night networking event on the (first evening), and our dinner and awards night on the (second evening). Lunch is included on each day of the conference. Registration is now open for participants, exhibitors, sponsors, advertisers, and speakers. The CTSC 2023 event is shaping up to be a professional development opportunity, simply not to be missed!

**Total Energy Capture (TEC)<sup>™</sup>** 

The competition teaches how to operate simplistic modified spectrum analyzers, we teach innovative methodology.

Our KSA<sup>™</sup> certification, teaches the fine art of modern day signal analytics. We teach technical operators how to define a competent Antenna Placement Distance (APD)<sup>™</sup> within a powerful Total Energy Capture (TEC)<sup>™</sup> environment. Our instructors teach technical operators to recognize gaps in detection strategies and see how past training has instilled significant limitations in the operators approach to critical thinking. Learn about TEC<sup>™</sup>, TCP<sup>™</sup>, TDSA<sup>™</sup> and other core technologies of tomorrow, that you can deploy today!

***Kestrel<sup>®</sup> provides a powerful real-time threat management enhanced, software development strategy to address new and evolving threat actor technology...***

There are many new and powerful revenue streams that can be realized by commercial operators, well beyond basic ineffective TSCM deployment strategy.

Join the powerful Kestrel TSCM<sup>®</sup> Professional Software community of global national security professionals. There are many benefits realized in moving away from single box resources and moving to a modern highly scalable Software Defined Radio (SDR) technology.

***Innovation is Simply  
the Beginning!***
