Kestrel TSCM ® Professional Software

The Mighty Kestrel ® Software | Authorized Master Distribution Partners Appointed

Paul D Turner, TSS TSI

The Future is Bright—Part II

After a very productive business trip to the United Kingdom (UK) and France (EU) in March 2023 several important business decisions were put into immediate action that saw the reorganization of our global distribution network.

Many changes have already been implemented to provide single source distribution across our master distribution partners in North America, United Kingdom, Europe, and South East Asia. This process was a massive undertaking that ensures the best support, training and hardware sales across very complex and different markets.

Our reorganization specifically targeted a growing number of entities that were providing various levels of unauthorized training and multiple level reseller sales to government entities across the UK and EU markets. We have now put a stop to these practices that saw end-users paying up to 4-times the published cost of the software; conflict of interest, and even counterfeit training.

All sales are now handled directly by our master distribution partners to ensure that the end-user is getting the best sales support, technical support, hardware advice and support, and most importantly, competent operator certification training.

The March 2023 visit provided and opportunity to support our UK | EU master distributor, Vilution Ltd., while connecting with our growing network of government, law-enforcement, military, and special operations software users, many of whom are based in the United Kingdom (UK) and the across the greater European Union (EU), including those in France, and Belgium. As we await the arrival of little Kestrel ® and our new government only SIGINT release of the Kestrel ® SIGINT Professional Software, our development and engineering teams is hard at work to advance the next generation, on many fronts!

Remember, in a Moving Target Threat Model the Technical Operator _is_ the Spectrum Analyzer...

Obviously, there are a number of noises out of joint with this reorganization and we are pleased that we have the full support of our growing client base benefiting from our ethical sales support.

Be Aware of Counterfeit Training!

We would like to remind all our customers that there is a growing number of, "it's all amount the money" companies who have little or no training, experience, or understanding of the powerful methodology behind the Kestrel TSCM ® Professional Software, necessary to provide a competent level of product training. We have been taking proactive steps to put an end to this counterfeit training, including those companies that post Kestrel ® sales and training on websites. When in doubt; give us a call directly, before you engage any company claiming they provide any measure of Kestrel ® training.

These various entities, have absolutely no permission or authority to market, or in any way provide training to commercial or government customers., nor engage in tenders providing the sales of the Kestrel ® software and / or our certification training. Doing so is a direct violation of our End-User License Agreement (EULA); registered trademarks, and intellectual property rights.

All Kestrel ® training is conducted directly by Professional Development TSCM Group Inc., in-house and authorized Technical Security Instructors (TSI); as arranged directly through PDTG Inc., or hosted by one of our master distribution partners, as follows;

♦ VILUTION LIMITED (UK) (EU);

♦ COMSEC LLC (USA); and

♦ SILVERTONE ELECTRONICS (AUS).

Initial training, annual recertification, operator certifications, custom programs, and professional development opportunities, are an absolute must for the modern spectrum warrior.

Our new format 5-day, 7-day, and 10-day Certified Technical Operator (CTO) [TM] and Certified Government Technical Operator (CGTO) [TM] programs teach a unique methodology approach.

Canadian Technical Security Conference (CTSC) ™
Training and Professional Development

Professional Development TSCM Group Inc.　　　　　　　　　Technical Security Branch (TSB)

Canadian Technical Security Conference (CTSC 2023) ™

CTSC 2024 will be held in Calgary Alberta Canada from Tuesday April 23, 2024 to Thursday April 25, 2024!

CTSC 2024 is the 16th annual event; hosted at the University of Calgary | Downtown Campus.

Our time honored competitive "bug-off" event, will take on a new format for CTSC 2014 and provides new technical challenges for CTSC 2024, for those entering the technical security industry; and for seasoned professionals alike. Our all day bug-off event is managed by the "office of evil intent"! Are you up to the challenge? Our low CTSC 2024 registration fee is just $495.00 CAD and includes our hospitality night networking event on the (first evening), and our dinner and awards night on the (second evening). Lunch is included on each day of the conference.

Registration is always open for participants, exhibitors, sponsors, advertisers, and speakers. CTSC 2024 is shaping up to be a professional development opportunity, simply not to be missed!

Kestrel ® provides a powerful real-time threat management enhanced, software development strategy to address new and evolving threat actor technology…

Professional Development TSCM Group Inc., is also running a special advanced 7-day Certified Technical Operator (CTO) ™ program the week prior, from Monday April 15, 2024 to Saturday April 21, 2024, leading up to the CTSC 2024 event, also at the University of Calgary | Downtown Campus.

You can attend our advanced Kestrel ® certification training and the conference event all in a single trip to Calgary Alberta Canada.

CTSC 2024 finishes up on Thursday, and participants might want to consider taking a mini-vacation in the mountains, before returning home. Canmore and Banff, are just a hour's drive (by vehicle) or shuttle bus from the Calgary International Airport.

Our CTO ™ training, professional development conference event, and perhaps a mini-vacation! You have three (3) very powerful incentives for joining us at CTSC 2024. Please contact us for additional information or visit; **https://ctsc-canada.com**
