

Kestrel TSCM ® Professional Software

The Next Industry Disruptive National Security Standard

Introducing the Kestrel ® SIGINT Professional Software

June 2023 | Issue 96

Technical Research and Standards Group

Paul D Turner, TSS TSI

Kestrel Focus on Excellence!

This year will see a primary focus on the United Kingdom (UK) and the European Union (EU) with an extended training mission confirmed from towards the end of September 2023 and into the beginning of December 2023.

The demand for official Certified Technical Operator (CTO)™ and Certified Government Technical Operator (CGTO)™ training has sky-rocketed this year, as our software continues to bring powerful new innovation, to satisfy mission critical national security roles.

The Kestrel software has continued to evolve, adapt, and bring innovative new features that have changed the way TSCM is administered.

As we await the arrival of little Kestrel® and our new government only Kestrel® SIGINT Professional Software, our development and engineering team is hard at work to advance the next generation of our software, on many fronts, and we are pleased that we have the full support of our growing client base benefiting from our ethical sales support.

Updated Operator Training

All Kestrel® training is directly conducted directly by Professional Development TSCM Group Inc., in-house and a limited number of authorized Technical Security Instructors (TSI); as arranged directly through **Professional Development TSCM Group Inc.**, or hosted by one of our global master distribution partners;

- ◆ VILUTION LIMITED (UK) (EU)
- ◆ COMSEC LLC (USA)
- ◆ SILVERTONE ELECTRONICS (AUS)

Our recommended initial training, annual recertification, advanced operator certifications, custom content program delivery, and professional development opportunities, are an absolute must for every modern spectrum warrior.

Our new format 5-day, 7-day, and 10-day Certified Technical Operator (CTO)™ and Certified Government Technical Operator (CGTO)™ programs teach a unique methodology and a standards-based TSCM approach.

Our 14-Day Technical Security Specialist (TSS) Designate Certification program remains the industry standard and includes our fully embedded radio-frequency Certified Technical Operator (CTO)™ program.

Kestrel® SIGINT Professional Software

There are two (2) very exciting and important developments on the horizon with little Kestrel to soon make an appearance, and our powerful new Kestrel® SIGINT Professional Software, with all the amazing advanced capability of our TSCM software version, and a strong showing of innovative SIGINT and technical analyst oriented features; all built around a government only release. Government only software; and government only operator certification training, is our on-going commitment to supporting a global national security mandate!

Our new SIGINT software includes numerous and essential core features such as our Advanced Project Management (APM)™, Advanced Radio Recovery (ARR)™, and our Selective Radio Initialization (SRI)™ technology, and these are just the beginning of a long list of innovative SIGINT features.

The release is set to be officially available in late August or early September 2023. However, the SIGINT capability will be rolled out and demonstrated during our scheduled training events in the US market during June, July and August 2023. Full SIGINT rollout will be included during our United Kingdom (UK) and European Union (EU) training in late September 2023, and during our scheduled October 2023 and November 2023 CGTO training programs.

SIGINT Certified Government Technical Operator and Certified Technical Analyst (CTA)™ training programs are on the horizon!

Remember, in a Moving Target Threat Model the Technical Operator is the Spectrum Analyzer...

Kestrel TSCM[®] Professional Software

16th Canadian Technical Security Conference (CTSC)[™] Advanced Training and Professional Development

Professional Development TSCM Group Inc.

Technical Security Branch (TSB)

Canadian Technical Security Conference (CTSC 2024)[™]

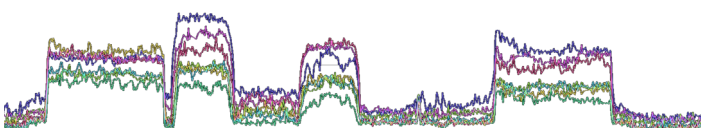

CTSC 2024 will be held in Calgary Alberta Canada from Tuesday April 23, 2024 to Thursday April 25, 2024 given the overwhelming success of the CTSC 2023 event. CTSC 2024 is the 16th annual event; hosted at the University of Calgary Downtown Campus.

Professional Development TSCM Group Inc., is also running an advanced 7-day Certified Technical Operator (CTO)[™] and Certified Government Technical Operator (CGTO)[™] program the week prior, to the conference from Monday April 15, 2024 to Saturday April 21, 2024, leading up to the CTSC 2024 event, also at the University of Calgary | Downtown Campus.

You can attend our advanced Kestrel[®] operator certification training and the conference event all in a single trip to Calgary Alberta Canada.

CTSC 2024 finishes up on a Thursday, and participants might want to consider taking a mini-vacation in the mountains, before returning home. Canmore and Banff are just a hour's drive (by rental vehicle) or shuttle bus from the Calgary International Airport.

Kestrel TSCM[®] Professional Software is innovative industry leading, disruptive technology, sold in 58 countries worldwide!

Please contact us for additional information or visit the CTSC 2024 website at <https://ctsc-canada.com>

Our time honored competitive “bug-off” event, will take on a new format for CTSC 2024 and provides new technical challenges, for those entering the technical security field; and for seasoned professionals alike. Our new all day bug-off event is managed by the “office of evil intent”! Are you up to the challenge? Our low CTSC 2024 registration fee is just \$495.00 CAD and includes our hospitality night networking event on the (first evening); our dinner and awards night, on the (second evening); a tasty working lunch is included during each day of the conference.

Registration is always open for participants, exhibitors, sponsors, advertisers, and speakers. CTSC 2024 is shaping up to be a professional development opportunity, simply not to be missed!

Kestrel[®] provides a powerful real-time threat management enhanced, software development strategy to address new and evolving threat actor technology...

***Innovation is Simply
the Beginning!***
